

Emergency Medical Response Guide

Introduction

Emergency situations require rapid assessment and appropriate first aid until professional help arrives.

CPR Basics

For an unconscious person not breathing normally, begin CPR with chest compressions and call emergency services.

Bleeding Control

Apply direct pressure using a clean cloth or bandage to control severe bleeding.

Burns

Cool burns with clean running water for at least 10 minutes and avoid applying ice directly.

Choking

For choking victims unable to speak, perform abdominal thrusts if trained to do so.

Stroke Warning Signs

Remember FAST: Face drooping, Arm weakness, Speech difficulty, Time to call emergency services.

Heart Attack

Symptoms may include chest pressure, sweating, nausea, and pain radiating to the arm or jaw.

Emergency Contacts

Always know local emergency numbers and nearest hospitals in your area.
